# About the program

The Joint Fuel Management Program (JFMP) encompasses fuel management activities planned to be delivered by Country Fire Authority (CFA) and Forest Fire Management Victoria (FFMVic) across the coming three years in the Gippsland FFMVic Region and South East CFA Region as depicted in **Map 1** below.

Each activity is led by either CFA or FFMVic and delivered with the support of partner agencies including the Department of Transport and Planning (DTP), Emergency Management Victoria (EMV), Traditional Owners, and local businesses.

The JFMP is prepared and implemented in accordance with the *Code of Practice for Bushfire Management on Public Land 2012 (amended 2022) (paragraphs 69 to 72)*, *Safer Together: A new approach to reducing the risk of bushfire in Victoria*, the Gippsland Regional Bushfire Management Strategy, and relevant CFA and FFMVic guidelines and procedures.

The Joint Fuel Management Program web page contains a live interactive map showing CFA and FFMVic planned burns and other fuel management activities for 2024-2025 to 2026-2027. The JFMP does not include burns managed by private landholders or industry. The JFMP webpage can be accessed via <https://www.ffmpeg.vic.gov.au/jfmp>.

It is important to note that the ability to carry out planned activities is dependent on seasonal and local weather conditions. To allow for this, planned burns from the second and third years of the program may be brought forward to the current year to replace a burn planned for the first year. Burns on public land associated with forest coupe regeneration as well as small heap burns are not included in the JFMP.

This document contains details about the following planned activities:

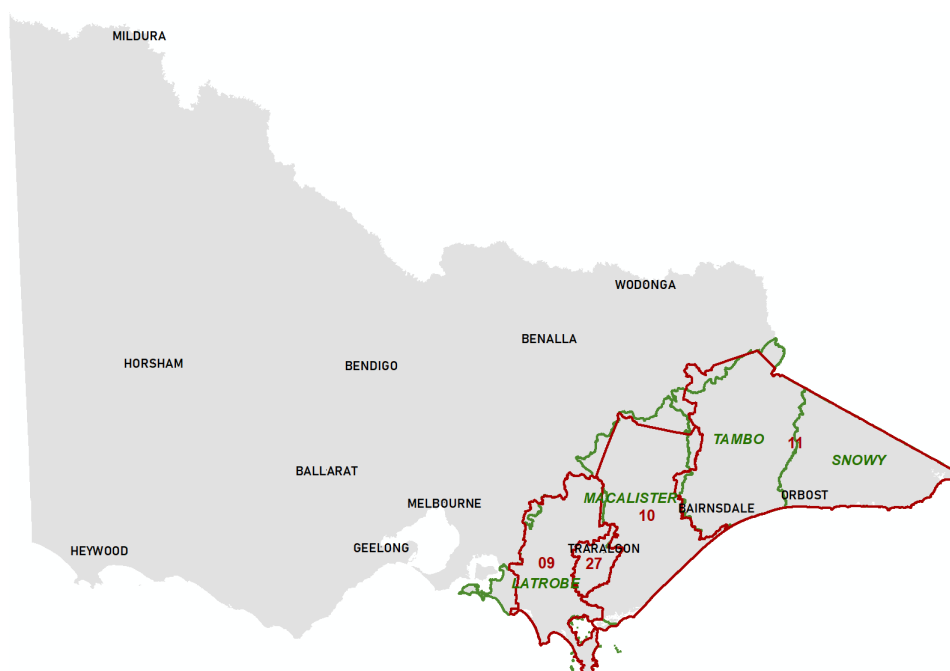

**Planned Burns** - fuel reduction, ecological and other planned burns by indicative year for the three-year period of 2024/25 – 2026/27.

**Non-Burn Fuel Treatments (NBFT)** - used to manage bushfire fuels through activities other than planned burning. Examples include mowing, slashing, mulching, spraying, rolling, and grazing.

**Strategic Fuel Breaks** - a strip of land where vegetation has been modified to form a safe and effective platform for fighting and controlling bushfires. They can also assist in the safe delivery of planned burns.

**Cultural burning** – planned burns led by Traditional Owners for a range of land management and cultural outcomes. They are supported by the fire agencies, and while they may have risk reduction benefits this is not generally the primary purpose.

# Strategic Fuel Breaks

Strategic Fuel Breaks can be one of two types:

**Landscape protection breaks (LPB):** Located in the forest to divide the landscape into units/areas suitable to help to reduce the fire to the smallest size possible. These breaks provide a platform for fighting fires in the forest and may also reduce fire impacts on nearby communities.

**Asset protection breaks (APB):** Designed to provide direct protections of communities and assets from the direct impacts of fire. These breaks are generally located adjacent to townships and assets.

The following strategic fuel breaks are proposed for construction (new) or renewal (upgrading of an existing break to meet standards) during 2024/25.

**Table 3 – Strategic Fuel Breaks planned for delivery by FFMVic in Gippsland**

# Cultural Burning

Cultural fire is fire deliberately put into the landscape lead by the Traditional Owners of that Country for a variety of purposes, including ceremony, protection of cultural and natural assets, fuel reduction, regeneration and management of food, fibre and medicines, flora regeneration, fauna habitat protection and healing Country's spirit.

We are guided by the [Victorian Traditional Owner Cultural Fire Strategy](#) which provides policy direction and a framework for fire and land management agencies to better enable Traditional Owners to undertake cultural burning for these cultural objectives.

There are six principles underpinning this strategy:

- cultural burning is right fire, right time, right way and for the right cultural reasons, according to lore
- burning is a cultural responsibility
- cultural fire is living knowledge
- monitoring, evaluation and research support cultural fire objectives and enable adaptive learning
- Country is managed holistically
- cultural fire is healing.

FFMVic and CFA recognise that cultural burning can assist landholders and communities in the use of fire to care for Country. The sharing of knowledge by our local Traditional Owners as well as from indigenous peoples from other parts of Australia will assist in improving our adaptive fire management practices in Victoria. This builds on supporting community through learning about how we live with fire. Working together to foster knowledge sharing is an important way to enable participation of Aboriginal communities.

Across the Gippsland Region, FFMVic and CFA are actively working together with Traditional Owner groups, guided by the direction they want to take and specific to the needs and wishes of the group. We continue to build on the strong working relationships that are recognized whilst being open to establishing new ones. Gunaikurnai Land and Waters Aboriginal Corporation (GLaWAC) and Snowy Cann Rivers First People's Country and Waters Aboriginal Corporation have nominated some burns that will be delivered with support from FFMVic and CFA.

While partnering with GLaWAC we have established the Gunaikurnai Operational Fire Partnerships Management Group, in which an engagement approach between the department and GLaWAC has been endorsed. Through this, for Gunaikurnai Country three types of burns have been identified:

**FFMVic Planned burns:** are FFMVic lead and GLaWAC is invited to support. GLaWAC is engaged as part of the JFMP and values checking process.

**Partnership burns:** meet both FFMVic/Gunaikurnai interests and objectives. This collaborative approach is led by either FFMVic or GLaWAC, supported by the other.

**Gunaikurnai burns:** are nominated, planned, lead and delivered by Gunaikurnai.

# Approval

The 2024/2025 – 2026/2027 Joint Fuel Management Program is approved by:

---

FFMVic Deputy Chief Fire Officer, Sam Quigley, Gippsland Region:

---

CFA Deputy Chief Officer, Trevor Owen, South East Region:

---

Noting for on-ground ignition and delivery of cross tenure and private property burns, FFMVic and CFA agency responsibilities remain unchanged.

## How to get involved

FFMVic and CFA welcome comment on strategic and operational fire management all year round. Due to the planning cycle your comments relating to certain aspects of the program may not be included until the following year's JFMP.

Comments and suggestions relating to the JFMP can be sent to:

# Appendix 1: FFMVic Schedules of Activities

These schedules contain the details of FFMVic-led fuel management activities. Please note that the planned burn year and season identified for each planned burn is indicative only and may be changed due to weather conditions and operational requirements.

Abbreviations may be used in the following Schedules:

'\*' asterisk on burn name denotes a cross tenure burn; PV – Parks Victoria; COM – Committee of Management; DEECA - Department of Energy, Environment and Climate Action; PP – Private Property; FRB – Fuel Reduction Burn; ECO – Ecological burn; TO – Traditional Owner; FMZ – Fire Management Zone; APZ – Asset Protection Zone; BMZ – Bushfire Moderation Zone; LMZ – Landscape Management Zone; PBEZ – Planned Burn Exclusion Zone; NZ – Not Zoned; EVD – Ecological Vegetation Division.
